

# **Premiere Privacy Consultants**

## **Mission Statement**

Premiere Privacy Consultants is dedicated to the preservation of personal freedom, privacy rights, and the principles enshrined in the Declaration of Independence.

We believe that men and women have the unalienable right to privacy, as long as they do not violate the lives, liberties, or property rights of anyone else. We believe that individuals are presumed innocent unless they are proven - beyond reasonable doubt and by verdict of an impartial jury - to be guilty of a crime. Without privacy there cannot be liberty. We are committed to the principle that there is nothing more valuable than the personal freedom of each and every human being; and that any regulation, rule or law requiring anyone to give up any portion of his or her personal freedom or privacy, is invalid law and should not be obeyed.

To promote these ends we provide techniques and mechanisms designed to protect assets, ensure personal freedom, and preserve the natural privacy rights of all people. We provide a variety of services to help facilitate these objectives.
